Package: TSF (via r-universe)

September 13, 2024

Type Package

Title Two Stage Forecasting (TSF) for Long Memory Time Series in Presence of Structural Break

Version 0.1.1

Author Sandipan Samanta, Ranjit Kumar Paul and Dipankar Mitra

Maintainer Dr. Ranjit Kumar Paul <ranjitstat@gmail.com>

Description Forecasting of long memory time series in presence of structural break by using TSF algorithm by Papailias and Dias (2015) <doi:10.1016/j.ijforecast.2015.01.006>.

`forecastTSF` *Forecasting fractionally differenced series using TSF approach*

Description

The function is used for forecasting long memory time series using TSF approach

Usage

```
forecastTSF(N0,Xt,bandwidth)
```

Arguments

`N0`	lead period of forecast
`Xt`	univariate time series
`bandwidth`	the bandwidth used in the regression equation

Value

`forecastTSF`	the predicted values, the out of sample forecasts and the values of long memory parameter

Author(s)

Sandipan Samanta, Ranjit Kumar Paul and Dipankar Mitra

Examples

```
## Simulating Long Memory Series
N <- 1000
PHI <- 0.2
THETA <- 0.1
SD <- 1
M <- 0
D <- 0.2
Seed <- 123
N0<-9
bandwidth<-0.9
```

```
set.seed(Seed)
Sim.Series <- fracdiff::fracdiff.sim(n = N, ar = c(PHI), ma = c(THETA),
d = D, rand.gen = rnorm, sd = SD, mu = M)

Xt <- as.ts(Sim.Series$series)

## Forecasting using TSF method
forecastTSF (N0,Xt,bandwidth)
```

`StructuralBrekwithLongmemory` *Predicting fractionally differenced series in presence of structural break*

Description

The function is used for prediction of long memory time series in presence of structural break

Usage

```
StructuralBrekwithLongmemory(ts,bandwidth)
```

Arguments

`ts`	univariate time series
`bandwidth`	the bandwidth used in the regression equation

Value

`StructuralBrekwithLongmemory`
the updated series at first step of TSF appraoch, prediction based on TSF approach and the estimate of long memory parameter

Author(s)

Sandipan Samanta, Ranjit Kumar Paul and Dipankar Mitra

Xt <- as.ts(Sim.Series$series)

## Forecasting using TSF method
StructuralBrekwithLongmemory(Xt,bandwidth)
```

TSF *Fractionally differenced series for any value of d*

Description

The function fdseries computes the fractional differenced series for any value of d i.e. positive or negetive.

Usage

```
fdseries(x, d)
```

Arguments

x	univariate time series
d	The orer of fractional differencing to be done

Value

fdseries	fractionally differenced series for both positive as well as negetive d

Author(s)

Sandipan Samanta, Ranjit Kumar Paul and Dipankar Mitra
